

On May 3, 2016 in the office of “Centre for Community Mobilization and Support” (CCMS) NGO was held “Human Library” initiative, which was organized by the "Women's Resource Center" NGO.

“Human Library” initiative aims to reduce discrimination through face to face interviews and personal stories and to change the stereotypes to different social groups.

Participants had the opportunity to interact and converse with the "live books” to learn about their experiences and problems, then discuss and identify stereotypes in society about these issues.
